Following are the questions received at the 3 Feb 04 site visit along with the Government's response:

1. Reference: Section C, Performance Work Statement, Paragraph C.1.4.1, titled Workload General Perspective.

Question: Code 914 provides a skilled workforce to perform RDT&E support requirements for the NAVSSES Engineering Departments. Would this workforce be assigned to other Engineering tasks in support of commercial entities or activities other than NAVSSES?

Answer: No.

2. Reference: Technical Exhibit, TEJ.5-01, titled Test Sites, Systems and Support Equipment/Facilities.

Question: On page 3 of 4 pages, TE J.5-01, site ID 982-11, Fuel Cell Lab, there is a reference to Building 776. Should this read building 77H?

Answer: This is correct as written. In TE J.3-01 Government Furnished Facilities, please refer to "Building 77H Complex, Item # 7, "776 Fuel Cell Building".

3. Reference: Technical Exhibit J.5-01.

Question: There are 124 test sites identified in TE J.5-01 and therefore, the performance of 124 tests at any one time would be possible but not likely. Annually, how many tests are being conducted or possibly could be conducted at the 124 test sites? Based on previous testing, would you also identify the longest period of time required to perform one test?

Answer: We do not know at this time how many tests will be run or at what times during the year. Offers should propose test site operations based upon the number of hours set forth in Section B.

4. Reference: Section C. Performance Work Statement, paragraph C.5.2.4, titled Fuel Systems and Operations.

Question: *Is the delivery of fuel to 77H complex only being delivered via a barge from Pier 7? How is the delivery of fuel provided to complex 663?*

Answer: Section C.5.2.4.4, Oil Management - 633 Complex, states "The SP shall receive fuel oil delivered by tank trucks and store fuel oil in eleven fuel oil storage/service tanks (total capacity 170K gallons)." Section C.5.2.4.5, Oil Management – 77H Complex, states "The SP shall receive fuel delivered by barge or truck IAW NAVSSESINST 4780.1 (series) and store in three (3) fuel oil storage and three (3) service tanks (total capacity 361K gallons) located at the 77H Complex."

5. Reference: Site Visit

Question: We were informed that there is no capability to distill water for test use. How is distilled water obtained? Is it a government responsibility?

Answer: Distilled water is currently obtained from city water and treated to a condition acceptable for testing purposes. This will be the government's responsibility.

6. Reference: Section C, Performance Work Statement, paragraph C.3.1.2.2.2, titled Bench Stock.

Question: The SP for the duration of the contract is required to maintain adequate levels of bench stock to perform the PWS requirements. Is the SP required to purchase these Bench stock items or are they government furnished? If SP to provide, please provide an inventory listing of Bench stock or annual cost for these items. Is the plug in number of \$75,000 in Section B allocated to purchase this material?

Answer: Section C.5.1.3.5, Spare Parts Inventory, states "The SP shall procure, control and store sufficient spare parts to maintain all equipment/sites at the required operational readiness level. The cost of these parts will be reimbursed by the Government through the contract." This section will be re-titled "Bench Stock Inventory" and referred to in C.3.1.2.2.2. The figure of \$75,000 in Section B is the amount allocated annually for this material.
